

JOYBLACK™ AS Carrier Black Masterbatches

For Injection Molding, Compounding & Sheet Applications

Description

JOYBLACK™ AS series black masterbatches are high-end black masterbatches based on AS(acrylonitrile-styrene) carrier, with excellent dispersion, high jetness and high concentration of carbon black properties. They offer excellent dilution, universality and ease of processing performance in the production of final articles. The final articles made with this series of black masterbatches will retain excellent mechanical properties, chemical resistance and weatherability.

Method of Addition

JOYBLACK™ AS carrier series black masterbatches are designed for ease of dilution and homogeneous mixing in plastic melts and therefore suit for direct addition or by pre-blending.

Compatibility

ABS、ASA、SAN、PC/ABS	Very Excellent
PC	Excellent
Nylon、PBT、PS	Good

Typical Properties

Model	CB Content	Application	Properties
AS95094	45%	Compounding	High concentration, High gloss, super high jetness
AS95093	45%	Compounding	High concentration, high gloss, high jetness
AS95092	45%	Compounding	High concentration, economy grade
AS95193	30%	Injection molding	High gloss, high jetness, Injection molding type
AS95593	45%	Compounding & Sheets	High concentration, excellent dispersity, high jetness

The data above is typical test values for guidance only, not final product specifications. Product specifications can be provided based on custom requirements.

Package

25KG/Bag Polythene Bag Store in a dry place. Recommended storage life: up to one year if stored as directed. After more than a year, it is recommended to retest the water.
